

17 April 2018

Declaration of Event of Force Majeure – Potassium Hydroxide Liquid.

Dear Customer,

By this letter, we are informing you that we have been affected last Thursday evening 12 April by an external event affecting the power supply to the Lillo site. This event, which was unforeseeable and beyond our control, caused a complete black-out of all the production units at the site and it lasted some time before the production of potassium hydroxide could be restarted. At this moment the plant is running normally again.

However this unexpected event has impacted our availability to supply potassium hydroxide at the committed volumes to you during the next weeks.

We are therefore forced to declare Force Majeure, effective from 17th April 2018.

We deeply regret this difficult situation and assure you that we are striving to reduce its impact and to return to normality.

You will be contacted by your usual INOVYN representative in order to provide you with details of the actual situation with regard to availability.

In the meantime, please don't hesitate to contact your usual interlocutor for any questions or clarification you may need.

Yours sincerely,

Bart Michiels
